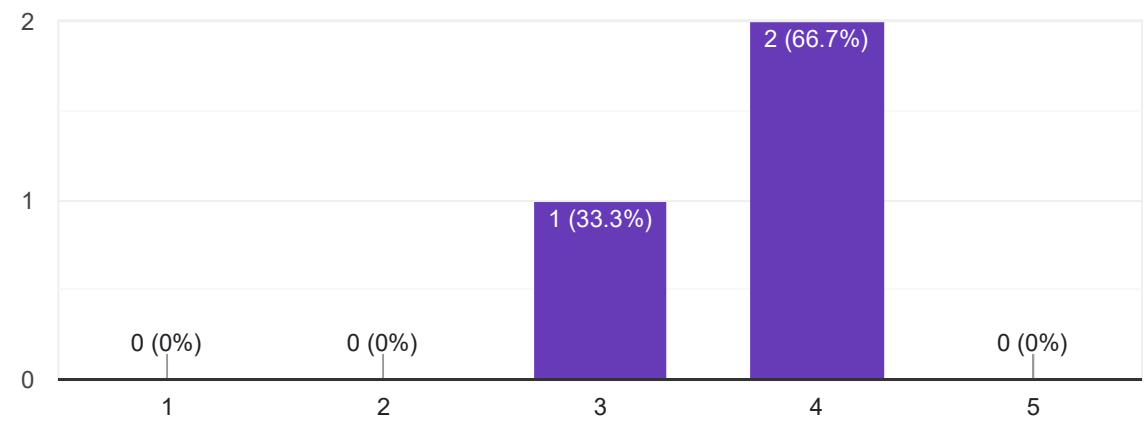
Questionnaire

Locomotion

I quickly understood how to take a shot and move through the map.

Copy

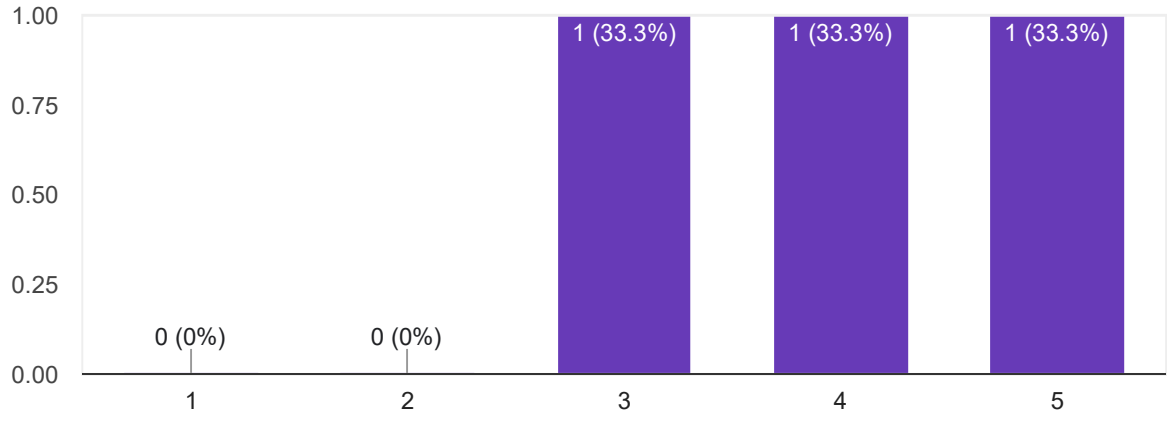
3 responses



I felt in control of where the ball travelled after each shot.

Copy

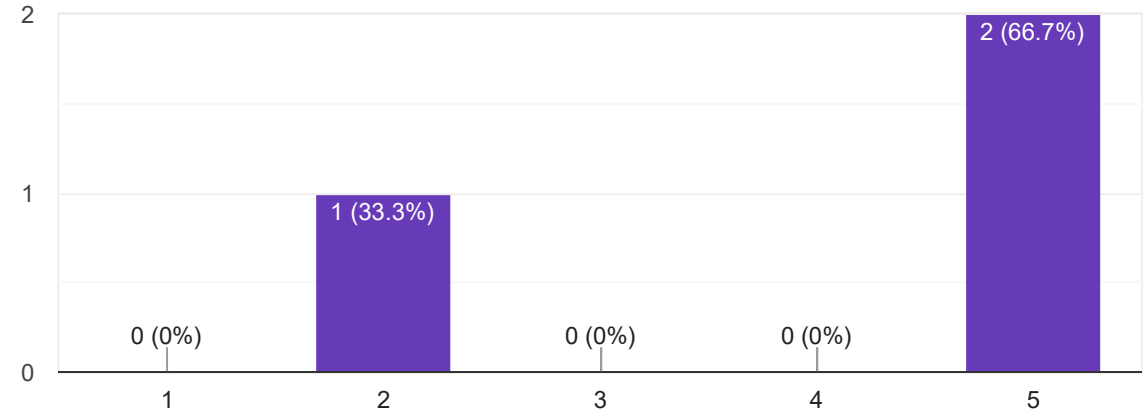
3 responses



The speed of movement felt natural.

Copy

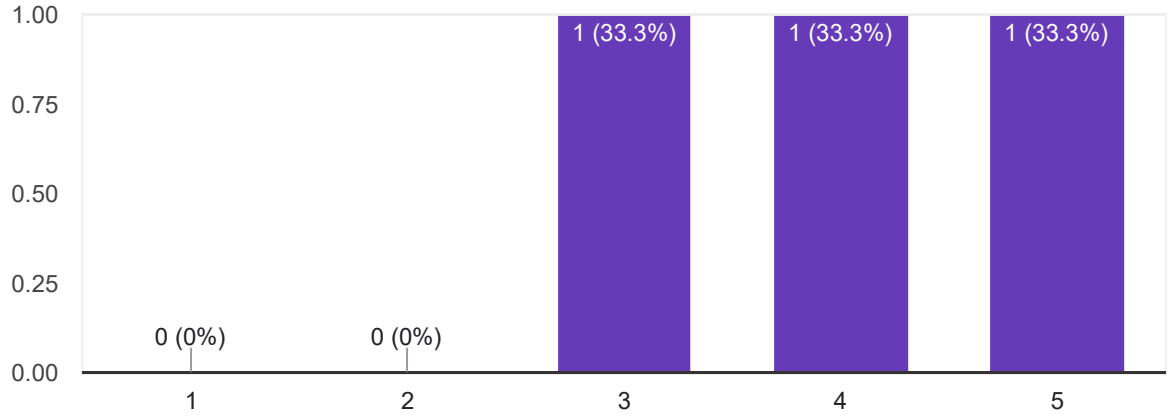
3 responses



I did not experience motion sickness or discomfort during play.

Copy

3 responses

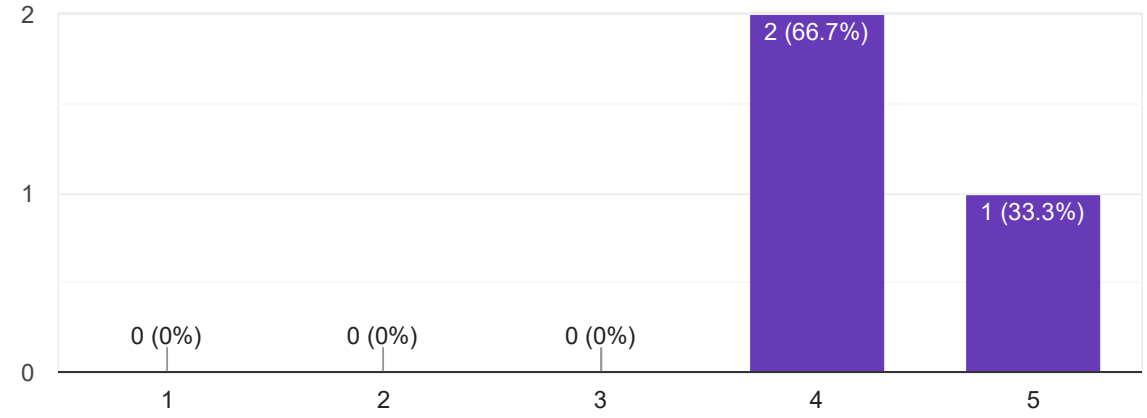


Interaction

I quickly understood how to pick up and move objects using the cue.

Copy

3 responses



I quickly understood how to rotate objects using the cue.

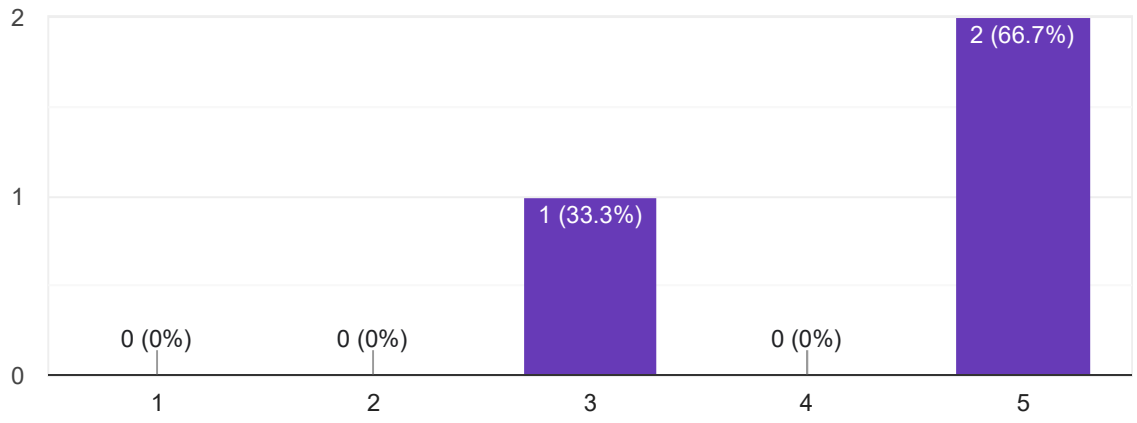
General

Copy

The felt present in the VR world.

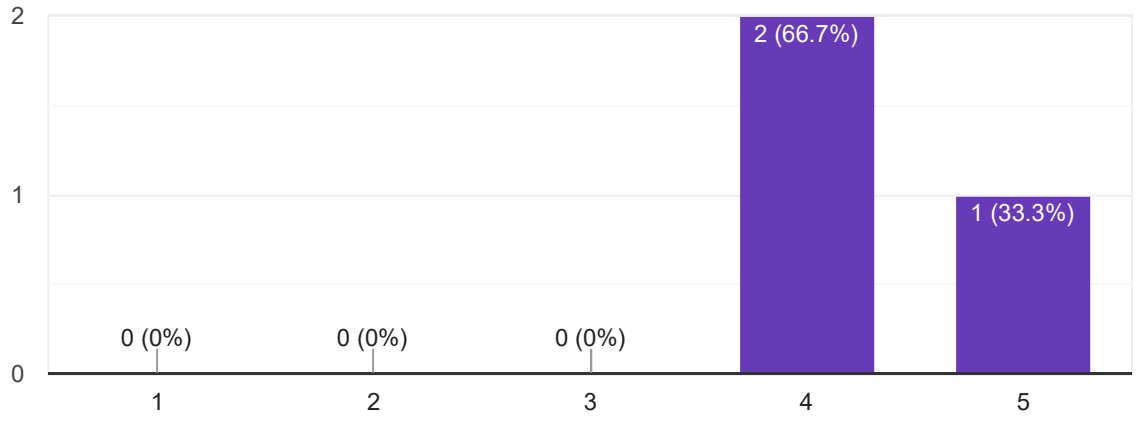
3 responses



How familiar are you with using VR applications?

Copy

3 responses



What was the most confusing or frustrating part of the experience?

3 responses

When I accidentally touched the done button on the last object task while still positioning the T-shaped object.

I don't if it is an issue from my side, but sometimes it was kind of difficult for me the hit the ball. I mean I am trying to hit, but the ball is not moving.

At first, I didn't manage to hit the ball hard enough to make it go faster. Other than that, I was just frustrated at my usual incompetence at pool

If you could change one thing, what would it be?

3 responses

There must be an easier allocation of all these controls.

Maybe much more realistic environment.

As a very far sighted person, the instructional text was a bit hard to read. But other than that, it was a great experience! I imagine playing it on an actual pool table (maybe with friends) could be a fun game.
