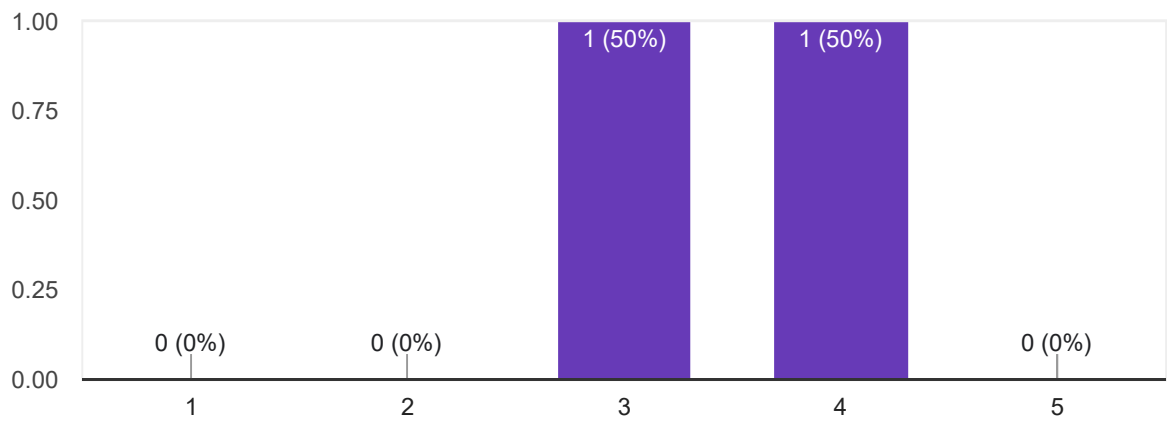
Questionnaire

Locomotion

I quickly understood how to take a shot and move through the map.

Copy

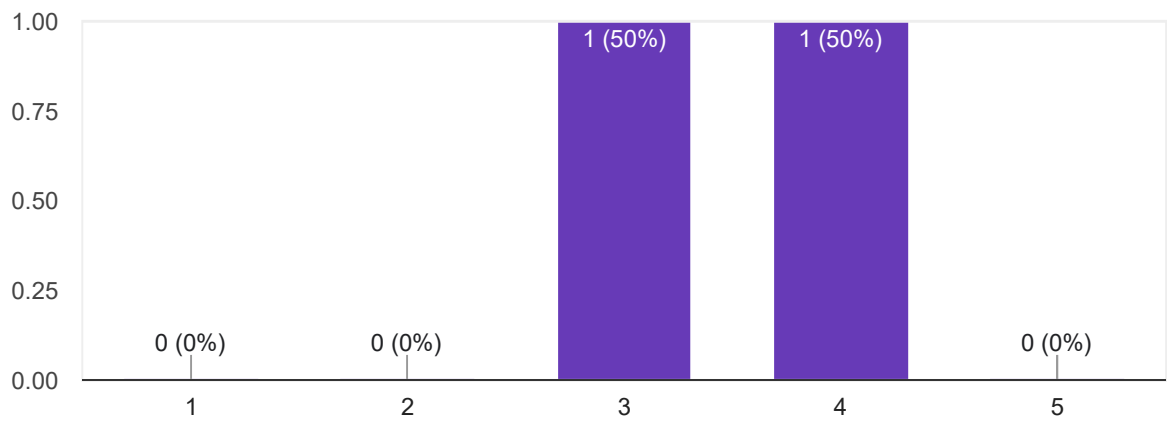
2 responses



I felt in control of where the ball travelled after each shot.

Copy

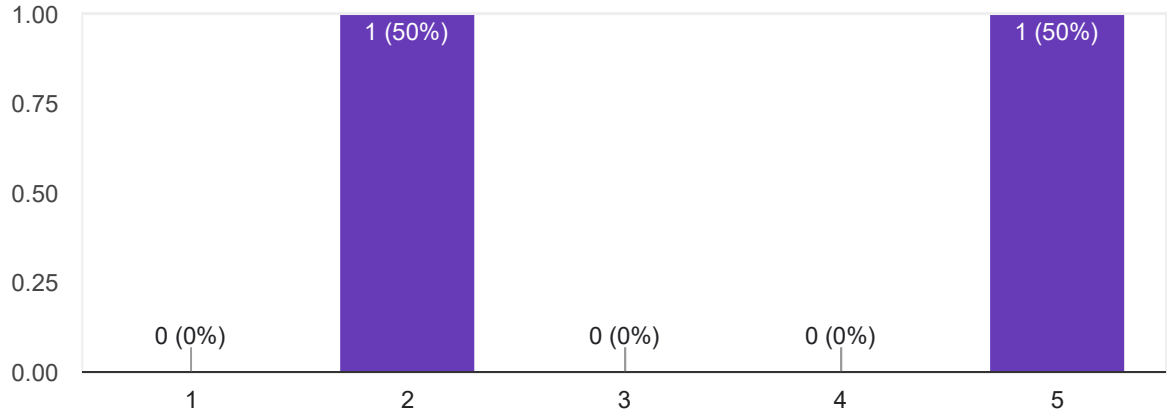
2 responses



The speed of movement felt natural.

Copy

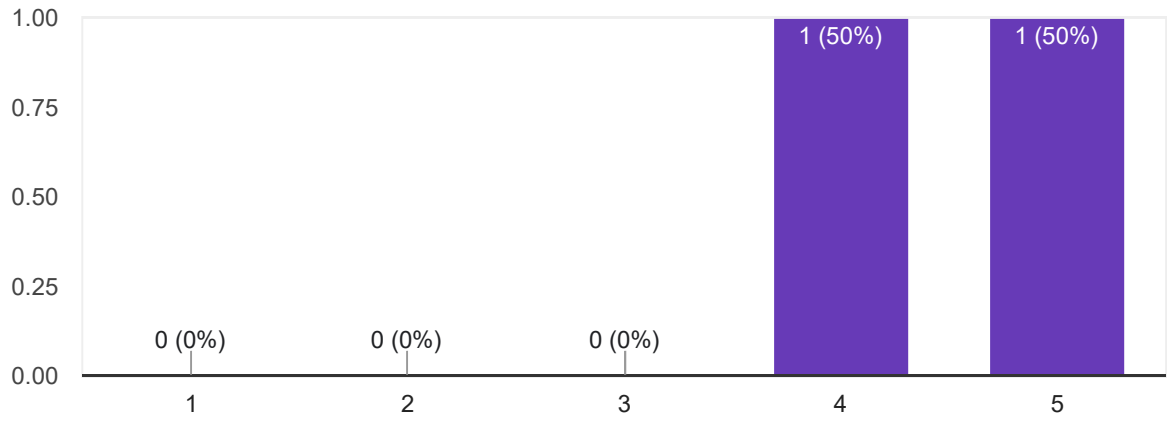
2 responses



I did not experience motion sickness or discomfort during play.

Copy

2 responses

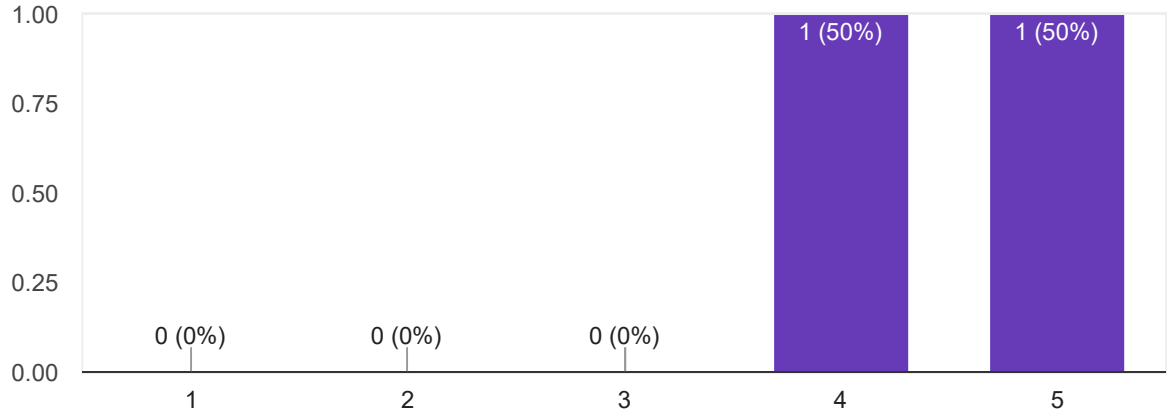


Interaction

I quickly understood how to pick up and move objects using the cue.

Copy

2 responses



I quickly understood how to rotate objects using the cue.

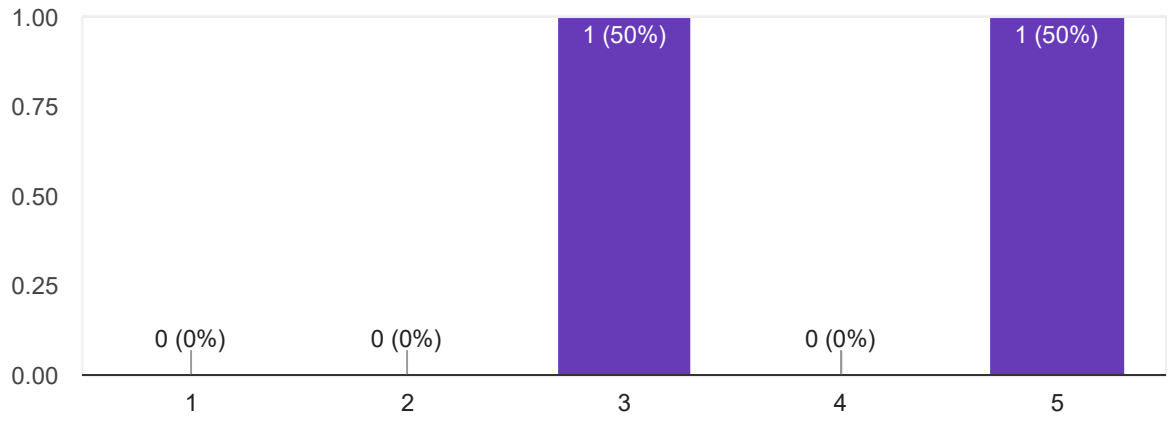
General

Copy

The felt present in the VR world.

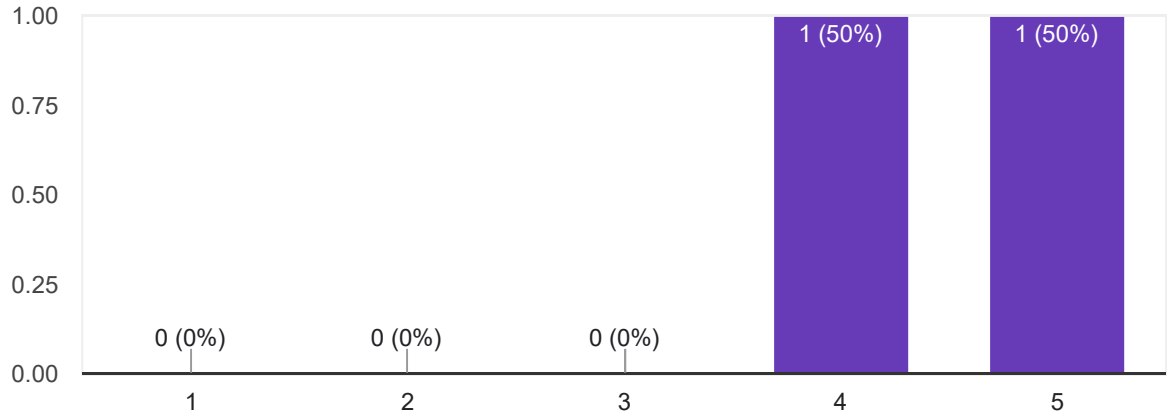
2 responses



How familiar are you with using VR applications?

Copy

2 responses



What was the most confusing or frustrating part of the experience?

2 responses

When I accidentally touched the done button on the last object task while still positioning the T-shaped object.

I don't if it is an issue from my side, but sometimes it was kind of difficult for me the hit the ball. I mean I am trying to hit, but the ball is not moving.

If you could change one thing, what would it be?

2 responses

There must be an easier allocation of all these controls.

Maybe much more realistic environment.
